

# KB Supervisor

- How do I backup the Supervisor?
- How do I reset the Supervisor PostgreSQL database?
- I am getting 'Invalid agenda item name "1". Skipping slice.' warnings in the QubeGUI. What's going on and how do I fix this?
- I can't seem to qbping the Supervisor, even though I know it is up
- Migrating Supervisor to new host
- Supervisor won't start because it can't open port 50002
