

qbstats

[[Description](#)] [[Usage](#)] [[Options](#)] [[Notes](#)] [[Examples](#)] [[See also](#)]

Description

qbstats displays a number of job statistics.

Usage

`qbstats` [*options*] *jobID*...

where *JobID* is one or more job IDs, and 0 is a wild card token representing all the user's jobs.

Options

Option	Description
--help	Command help
--version	Command version

Notes

Examples

Display the stats for job 12354, subjob 1:

```
% qbstats 12354.1
```
