

# Search Paths

Having the Qube! commands available in the path from the command-line can be useful. Here is what is needed to set this up:

- **Linux** (~/.cshrc/ or ~/.tcshrc):
  - a. `setenv QBDIR /usr/local/pfx/qube`
  - b. `set path = ($path $QBDIR/bin $QBDIR/sbin)`
- **Linux** (~/.bashrc):
  - a. `export QBDIR=/usr/local/pfx/qube`
  - b. `export PATH=$PATH:$QBDIR/bin:$QBDIR/sbin`
- **OS X** (~/.bashrc):
  - a. `export QBDIR=/Applications/pfx/qube`
  - b. `export PATH=$PATH:$QBDIR/bin:$QBDIR/sbin`
- **Windows:** The .msi automatically adds the `C:\Program Files\qube\bin` to the PATH.
