

qbhist

[[Description](#)] [[Usage](#)] [[Options](#)] [[Notes](#)] [[Examples](#)] [[See also](#)]

Description

qbhist obtains the history of a job as recorded by the Supervisor..

Usage

`qbhist [options] jobID... | 0`

where *JobID* is one or more job IDs, and 0 is a wild card token representing all the user's jobs.

Options

Option	Description
--xml	Output in XML format
--help	Command help
--version	Command version

Notes

Examples

List history for only subjob 12354.0:

```
% qbhist 12354.0
```

List history for all of 12354:

```
% qbhist 12354
```
