

supervisor_manifest

Synopsis

`supervisor_manifest = path`

path were the manifest log is located. This log contains all events concerning jobs and their actions. The format is similar to the job *.hst file format and provides a quick mechanism for looking at all logged events at one time.

Example

`supervisor_manifest = /tmp/manifestlog`

Defaults

- Linux & OS X: `/var/spool/qube/manifestlog`
- Windows XP/2003: `C:\Program Files\pfx\qube\logs\manifestlog`
- Windows Vista/2008/7: `C:\ProgramData\pfx\qube\logs\manifestlog`
