

# mail\_port

## Synopsis

```
mail_port = port
```

*Port* is the port number to use to contact the SMTP server.

Setting this to 0 (default) tells the system to use sensible default ports depending on the mail\_connection\_type-- 25 (DEFAULT), 465 (SSL), or 587 (TLS)

## Example

```
mail_port = 1025
```

## Defaults

0
