

# supervisor\_heartbeat\_interval

## Synopsis

`supervisor_heartbeat_interval = interval`

*Interval* is the duration in seconds, within which the Workers must report their status to the Supervisor. Any Worker not reporting within the *interval* is contacted for a status report. That request must be answered before `supervisor_heartbeat_timeout` seconds - if not, the Worker is marked as "down".

## Example

`supervisor_heartbeat_interval = 1000`

## Defaults

360
