

# supervisor\_worker\_configfile

## Synopsis

`supervisor_worker_configfile = file`

*File* is the Worker config file used for centralized Worker configuration. The Supervisor has the ability to use a macro-based configuration system via the Worker config file.

## Example

`supervisor_worker_configfile = /etc/myqbworkers.conf`

## Defaults

- Linux & OS X: `/etc/qbwrk.conf`
- Windows Vista/2008/7: `C:\ProgramData\Pfx\qube\qbwrk.conf`
- Windows XP/2003: `C:\Windows\qbwrk.conf`
