

Qube 6.4 Documentation

This is the documentation for **Qube 6.4-5**.

[Release Notes](#) are available for this and all other versions of Qube.

Documentation for the latest version can be [found here](#).

This is the new home for PipelineFX's on-line documentation.

This should be the first place you look for answers to questions which arise when you're working with Qube.

We're working hard to bring all our documentation to our customers in this new format, and welcome your feedback. **Please, if you find an error, omission, or something which could be made clearer, leave a comment on the page** and we'll attend to it.
