

supervisor_max_cpus_limit

This parameter is one of several that configure the [SmartShare](#) behavior.

Synopsis

```
supervisor_max_cpus_limit = integer
```

The largest value of “max_cpus” parameter that can be used on any job, for [SmartShare](#). If any job specifies a value greater than this, the system will silently cap it to this value.

Example

```
supervisor_max_cpus_limit = 20
```

Defaults

100
