Qube 6.9-2b Release Notes

```
###########################################################################
@RELEASE: 6.9-2b
###########################################################################
```

@SUMMARY: This is a supervisor-only patch release of 6.9-2 that includes the
following key fixes.

==== CL 18910 ====
@INTERNAL FIX: supervisor patches to help cut down on the number of threads,
and reduce chances of repeated worker rejections on some farms due to
race-conditions/timing issues.

ZD17713

==== CL 18822 ====
@FIX: a bug in the startHost() dispatch routine causing the supervisor NOT to
always dispatch jobs to workers when they became available.

ZD: 17713
