

Where is the MySQL configuration file?

The PostgreSQL install location is OS-specific:

Linux:

```
/usr/local/pfx/pgsql
```

Mac:

```
/Applications/pfx/pgsql
```

Windows (all versions):

```
C:\Program Files\pfx\pgsql
```

The data directory, configuration file, and log file are all located relative to the PostgreSQL install folder, <PGSQL_DIR>:

```
data: <PGSQL_DIR>/data
```

```
conf: <PGSQL_DIR>/data/postgresql.conf
```

```
log: <PGSQL_DIR>/pgsql.log
```
