

Where is the MySQL configuration file?

The PostgreSQL install location is OS-specific:

Linux:

`/usr/local/pfx/pgsql`

Mac:

`/Applications/pfx/pgsql`

Windows (all versions):

`C:\Program Files\pfx\pgsql`

The data directory, configuration file, and log file are all located relative to the PostgreSQL install folder, <PGSQL_DIR>:

data: <PGSQL_DIR>/data

conf: <PGSQL_DIR>/data/postgresql.conf

log: <PGSQL_DIR>/pgsql.log
